3. PROGRAM NARRATIVE

The medical program has enhanced supportive services to young families. Our clinical case manager and behavioral health consultant are working together more closely than ever to make sure that our pre- and postpartum mothers and young children are assessed for behavioral health needs at each medical visit. Patients are screened by their medical provider and then receive low-complexity behavioral and psycho-social support as needed. This service enhancement is working to support mothers in being educated, equipped and confident to be excellent caregivers to their new babies.
