The city has worked hard to help promote and nurture a community that is inclusive and welcoming to everybody. This senseless act will not deter our efforts or commitment toward the goal.

This latest act included using some type of explosive devices to damage a row of painted doors that have the words, “God’s doors” on them. These doors, part of our special display in front of United Christian Church. The latest in this week included using some type of explosive devices to damage a row of painted doors that have the words, “God’s doors” on them.

The community has rallied behind the church to denounce this vandalism. This is a setback, but I am confident in our community’s ability to come together to heal. We are one Renton. We will continue to have a strong presence of law enforcement in the area to prevent and respond to crimes.

Pride Flag Flies Proudly Over Renton

Pride Month in Renton, adopted by the City Council on June 3.

Pride Flag as part of the Pride Month celebration. This was the first time we have flown the Pride Flag on a city facility and it came in conjunction with a city proclamation recognizing Pride Month in Renton, adopted by the City Council on June 3.

ON MONDAY, members of my staff and the community met in front of City Hall to raise the Pride Flag on the city's flag pole. The flag was raised in honor of Pride Month, which is celebrated in June to commemorate the Stonewall riots of 1969 and the subsequent LGBTQ+ rights movement.

This action was a meaningful step in acknowledging the diversity and resilience within our community. It was a moment to celebrate unity and pride, and it served as a reminder of the progress that has been made towards equality and inclusivity.

In the coming days, I encourage everyone to reflect on the importance of respecting and celebrating diversity. Let us remember the history of the LGBTQ+ community and continue to work towards creating a more inclusive and equitable society for all.

Ground broken for Kennydale reservoir

I WAS PLEASED TO BE JOINED Wednesday morning by elected officials, city staff, project staff and residents as we broke ground on the Kennydale Reservoir project. The reservoir is located on the site of Fire Station 15, which opened last February. Both the reservoir and Fire Station 15 are part of the City’s ongoing efforts to improve the reliability and quality of water supply for our residents.

The reservoir will be used to provide storage for the domestic water system. Adding this 1.3 million gallon reservoir will allow for a reliable domestic water supply for our residents. The reservoir is co-located on the site of Fire Station 15, which opened last February. The reservoir and Fire Station 15 are part of the City’s ongoing efforts to improve the reliability and quality of water supply for our residents.

The reservoir and Fire Station 15 are part of the City’s ongoing efforts to improve the reliability and quality of water supply for our residents.

This is tremendous news and a major milestone for the city. Sound Transit’s commitment to the downtown transit center and our purchase of the former Sound Ford site prove that our city is continued to be an important and valuable asset to the downtown area.
