

**Public Notice**  
**The City of Renton to Apply Mosquito Control Pesticides**

The City of Renton may use mosquito larvicides and adulticides to help control mosquitoes in accordance with the Washington State Department of Ecology's Aquatic Mosquito Control General Permit. The larvicide, VectoLex, is made of a natural bacterium, the active ingredient being *Bacillus sphaericus* 2362, Serotype H5a5b, strain ABTS 1743. The adulticide, Aqualuer 20-20®, contains active ingredients Permethrin and Piperonyl Butoxide. Treatments may occur between May 16 and October 31, 2016. Larvicide treatment will generally occur in stormwater facilities owned or maintained by the City. Adulticide treatment areas are generally located in upland areas east of SR-167 and west of Lake Avenue South/Talbot Road South between the 3900 block of Talbot Road South to the south and I-405 to the north, within the City of Renton, Washington. Information about the larvicides, adulticides and a map of the specific locations are available at <http://www.rentonwa.gov/living/default.aspx?id=10516>.

For more information about the City's commitment to help reduce the threat of West Nile virus and control mosquitoes or to have your residence put on a "No Spray" list, please contact Kristina Lowthian, City of Renton Surface Water Utility Engineer, at 425-430-7249 or by email at [klowthian@rentonwa.gov](mailto:klowthian@rentonwa.gov). If you received an "Authorization and Release" form by mail and did not sign and return it by April 28, 2016, you have automatically been placed on the "No Spray" list.

For additional information about Ecology's Aquatic Mosquito Control General Permit, please contact the City of Renton or Jon Jennings, Water Quality Program, Washington State Department of Ecology, at 360-407-6283 or by email at [jonathan.jennings@ecy.wa.gov](mailto:jonathan.jennings@ecy.wa.gov).

Jason A. Seth  
City Clerk
